Satellite Internet - DISH High-Speed Internet | DISH

Although a connection to a LAN may provide very high data-rates within the LAN, actual Internet access speed is limited by the upstream link to the ISP. LANs may be wired or wireless. Ethernet over twisted pair cabling and Wi-Fi are the two most common technologies used to build LANs today, but ARCNET , Token Ring , Localtalk , FDDI , and other technologies were used in the past.

Internet access - Wikipedia

Broadband or high-speed internet service allows users to access information via the Internet using one of several high-speed transmission technologies. Transmission is digital, meaning that text, images, and sound are all transmitted as "bits" of data.
