Sparrowhawk - Simple English Wikipedia, the free encyclopedia

Both Ticehurst (in A Systematic Review of the Genus Phylloscopus, 1938) and Svensson (in Identification Guide to European Passerines, 1992), emphasised their similarity. By implication, many individuals will be impossible to separate from collybita in the field.

Suomen Lintuvaruste Oy

The European green woodpecker is a large green woodpecker with a bright red crown and a black moustache. Males have a red centre to the moustache stripe which is absent in females. It is resident across much of Europe and the western Palearctic but in Spain and Portugal it is replaced by the similar Iberian green woodpecker (Picus sharpei).. The European green woodpecker spends much of its ...

European goldfinch - Wikipedia

Description. The sparrowhawk is a small bird of prey with short, broad wings and a long tail. These adaptations help it to fly between trees.Females can be up to 25% larger than males and can be twice as heavy. When females are larger than males, it is called "reverse sexual dimorphism".It is unusual in higher vertebrates but typical in birds of prey.. The adult male is 29-34 cm (11-13 in ...

European green woodpecker - Wikipedia

The European goldfinch or simply the goldfinch (Carduelis carduelis), is a small passerine bird in the finch family that is native to Europe, North Africa and western and central Asia.It has been introduced to other areas, including Australia, New Zealand and Uruguay. The breeding male has a red face with black markings around the eyes, and a black-and-white head. The back and flanks are buff ...
