### Metaprogramming Elixir: Write Less Code, Get More Done ...

Metaprogramming is the process of using code to write code. In Elixir this gives us the ability to extend the language to fit our needs and dynamically change the code. We'll start by looking at how Elixir is represented under the hood, then how to modify it, and finally we can use this knowledge to extend it.

### Metaprogramming Elixir Write Less Code

### Metaprogramming Elixir: Write Less Code, Get More Done ...

Write code that writes code with Elixir macros. Macros make metaprogramming possible and define the language itself. In this book, you'll learn how to use macros to extend the language with fast, maintainable code and share functionality in ways you never thought possible.

### Metaprogramming Elixir - O'Reilly Media

complex, performant code or slower, elegant APIs. Elixir macros let you write simple code with high performance. They turn you, the programmer, from language consumer to language creator. No longer are you merely a user of the language. You have access to all the tools and power that José used to write the standard library.
