4 1. COMPLEX FUNCTIONS Exercise 1.8. Consider the set of symbols $x+iy+ju+kv$, where x, y, u and v are real numbers, and the symbols i, j, k satisfy $i^2 = j^2 = k^2 = -1, ij = ji = k, jk = ik = i$ and $ki = ik = -j$. Show that using these relations and calculating with the same formal rules as in dealing with real numbers, we obtain a skew field; this is the set

The second volume develops the theory of Riemann surfaces and introduces several complex variables and more modular forms (of huge importance to modern number theory). They are filled with interesting exercises and problems most of which are solved in detail at the end! You just need a good background in undergraduate analysis to manage.
