Assisted Reproductive Technologies. The 1992 Fertility Clinic Success Rate and Certification Act mandates that all clinics providing assisted reproductive services report results annually to the Centers for Disease Control and Prevention (CDC). 9, 10 The Act defines "assisted reproduction technologies" as those that involve the handling of both sperm and eggs.

Manual of Assisted Reproductive Technologies and Clinical ...

Assisted reproduction can raise complicated ethical challenges for the individuals involved, health care professionals, and the greater society. Infertility treatments today create new definitions of parents and children and require a rethinking of the conventional notions of family. For families facing infertility, decisions about family building become complex. One ethical dilemma associated ...

Introduction - Effectiveness of Assisted Reproductive ...

This review evaluated the safety and effectiveness of assisted reproductive technology, ovulation induction and superovulation. It concluded that there was little high-quality evidence upon which to draw conclusions regarding the choice of specific interventions. This was generally a well-conducted review and the authors' conclusions are likely to reflect the available evidence.
